

The History and Technology of **Darksuckers**

at the Mandurah Community Museum

Join Richard Rennie, curator and scientist from the Fremantle Light and Sound Discovery Centre, for his travelling exhibition on the history and technology of darksuckers, from Edison lamps to DADs (dark absorbing diodes).

What: Explanatory talk on darksuckers
30 minute presentation followed by exhibition

When: Monday 3 August
2.00 - 3.00pm with afternoon tea or
5.30 - 6.30pm with wine and cheese (cost \$5.00)

Contact: museum@mandurah.wa.gov.au
or 9550 3680

For years it has been believed that electric light globes emit light. However recent information from Bell Laboratories has proven otherwise. Electric light globes don't emit light, they suck dark. Thus, they must now be called **darksuckers**.
